# SITUATION SUMMARY

## Northern California Weather of Concern

- The large majority of the latest system has passed as it continues east. The low pressure bringing the winds and rain is forecast to move over the Great Basin this weekend. Scattered showers are predicted, [albeit with a medium to high confidence](#), at times both Saturday and Sunday. The locations and timing of any rain remain to be determined. This is a cool storm so temperatures will be well below normal and it's possible the area could up to 4 inches of snow impacting [Southern Sierra passes above 9000 feet](#), such as Sonora and Tioga. Rainfall in the valleys could reach 0.50 inches through the weekend, with higher amounts possible if a band of rain holds over any one area. An additional 0.25 - 0.50 inches of rainfall estimated is for King Fire Burn area.

## Southern California Weather of Concern

- Monsoonal moisture is returning to Southeastern California. Isolated to scattered showers and thunderstorms will develop across southeast California. [Today, confidence is high for thunderstorms with heavy rain, localized flooding, and possible hail with strong winds. Some storms have the potential to become severe, meaning strong surface winds and large hail.](#) Atmospheric conditions are favorable for some fast moving, organized thunderstorms which can produce heavy rain, large hail, and strong winds. Individual thunderstorms will generally move to the north at 30 to 40 mph which will diminish the threat of flash flooding with any one storm. However, training storms are possible which could repeatedly produce heavy rain over the same local areas. [Rain coverage and intensity will likely peak by either late morning or early afternoon.](#)

### **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

An upper level low will move slowly east over the weekend bringing some clouds, but generally dry conditions. A weak front may bring some very light rain to areas north of Cape Mendocino Monday night. Dry conditions and warming temperatures are expected mid to late next week.

#### **San Francisco Weather:**

Outside of a few showers today over higher elevation locations, look for generally dry weather for the weekend. Cooler-than-normal daytime temperatures are expected through the weekend, especially for inland locations. A gradual warming trend is forecast for next week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Cool weather with lingering showers or thunderstorms possible, mainly over the mountains, through this weekend. Dry and warmer conditions are expected next week with locally breezy wind.

#### **Hanford Weather:**

Temperatures will continue to trend downward through today as a low pressure system moves through California. In addition, some light showers will be possible across the Southern Sierra Nevada through Sunday with light snow possible down to 8000 feet this morning; with the snow level rising to 8500-9000 feet this afternoon through Sunday. High pressure will bring a return of warmer and drier conditions next week.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

A cooling trend will continue through this weekend as an upper level low pressure system settles over Central California. Gradual warming is then expected through the middle of next week as the upper low moves east. More significant warming is possible later next week as high pressure builds into the Great Basin and offshore flow develops.

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

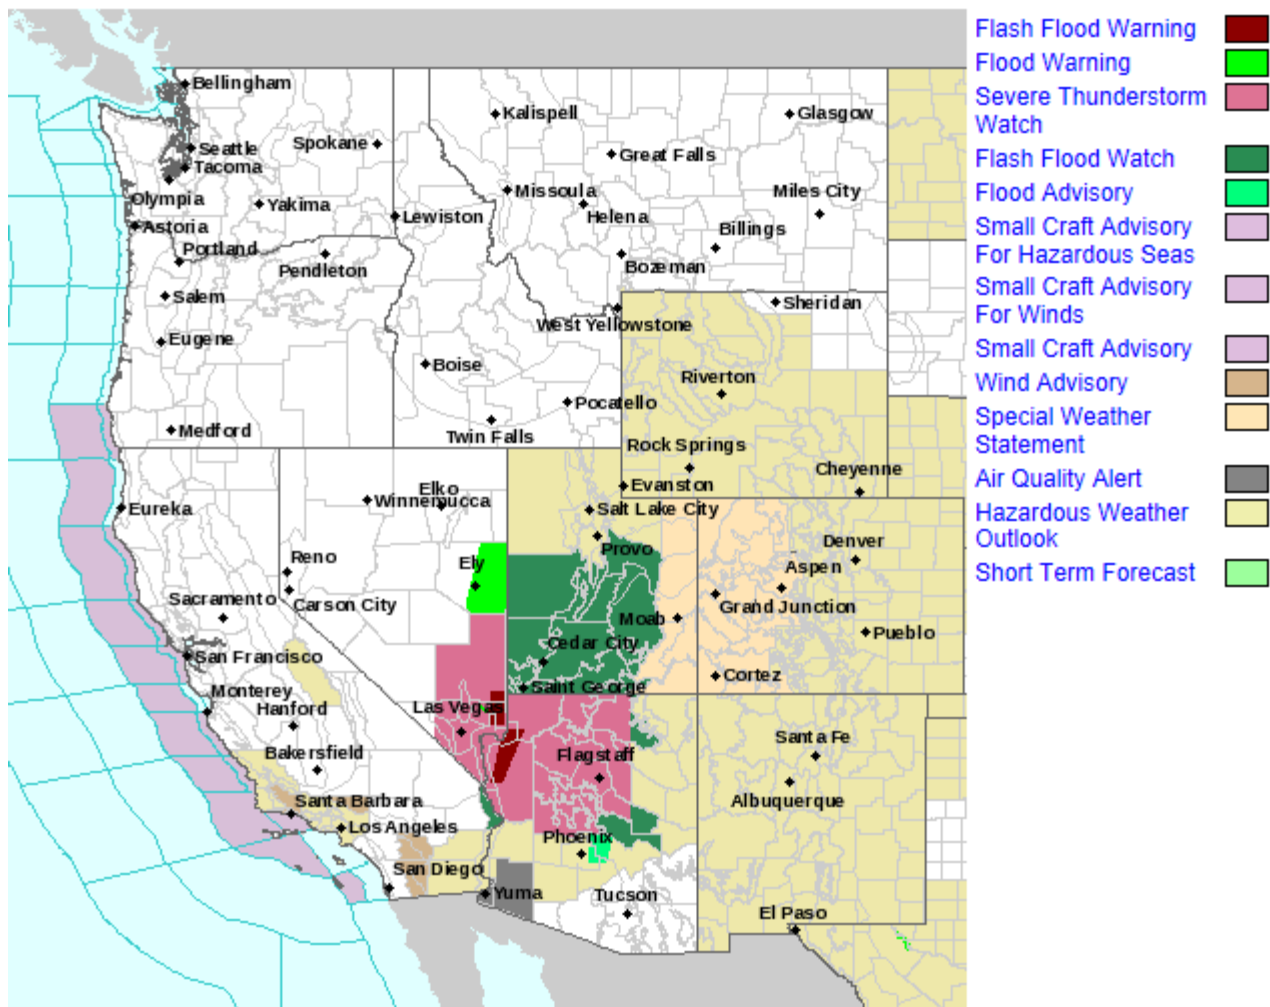

Cooling conditions through Saturday as a trough moves inland across Central California. The marine layer will deepen tonight when low clouds will spread across the inland valley along with patchy drizzle west of the mountains Saturday morning. This trough will also bring gusty southwest to west winds over the mountains and deserts this afternoon through Saturday night. The weather will turn warmer early next week as temperatures rise to near normal once again.

#### **Southeast California Weather:**

A strong Pacific low pressure system was moving into Southeastern California. The combination of strong storm dynamics and high atmospheric moisture content will produce scattered showers and thunderstorms.

## **Boles Incident, Vegetation Fire- City of Weed, Siskiyou County**

### **Cal OES Deployments**

- Two (2) Cal OES Assistant Fire Chiefs are assigned.
- Two (2) Cal OES Region staff are assigned.
- One (1) Cal OES Public Information Officer assigned.

### **Activations**

- Co-Located Siskiyou County and City of Weed EOC activated at Level 2.

### **Shelter Operations**

- American Red Cross Shelter - Mount Shasta Armory, 618 Everitt Memorial Hwy, Mount Shasta has closed.

### **Fire Suppression Water Issue**

- The City of Weed lost one of its drinking water storage tanks and is drawing water from a second tank. Cal OES is working with the Drinking Water Program to assist with finding a solution to this issue. The State Water Quality Control Board, Drinking Water Program (DWP) has reached out to the city. Per DWP, the City of Weed water system has six reservoirs (storage tanks). The one that was damaged by the fire was one of their smallest reservoirs. There are no issues with the drinking water supply. The self-imposed boil water order in the downtown area is lifted. City is concerned with water supply to fight fires in the future. As an interim solution, water tenders are in place throughout the city to provide water for fire suppression.

### **Schools**

- Weed High School and Weed Elementary School opened for normal operations on 09/23/14.
- The elementary school was partially damaged but staff will transfer classes to other parts of school.
- Students will be bussed through the fire zones.

# **RECOVERY ACTIVITIES**
